Customer Entitlement and Authorization Matrix -- Meridian Capital (Page 1 of 15)

This document provides a consolidated, reader-friendly matrix of customer entitlements across Meridian Capital's client-facing applications. Content on this page reflects the Q2 FY2026 authorized baseline as attested by application owners and the Identity Governance Office. The matrix is designed to support operational reviews, quarterly certifications, and audit validation of standard customer capabilities. It includes descriptive identifiers, approval authorities, and review metadata without procedural detail. All entries reference production usage unless explicitly noted; pre-production environments are cataloged in a separate appendix. Ticket references map to finalized changes or documented clarifications; timestamps reflect the latest verification events. Teams listed as control owners are accountable for ongoing stewardship, including lifecycle updates and attestation completeness. No conditional access rules, authentication configurations, or privileged operational instructions are documented in this section. All items below are scoped for customer-facing roles only.

Notes:

- All entries above require customer enrollment in the respective platform prior to assignment; enrollment governance is covered in the Platform Onboarding Catalog (REF-DOC-PLAT-ONB-2026).
- "Approval Authority" denotes the accountable group for granting or attesting to access. It does not imply process steps.
- Status "Active" indicates entitlement is in the current catalog. Retired or superseded records are maintained in the deprecation annex with end-dating.

Customer Entitlement and Authorization Matrix -- Meridian Capital (Page 2 of 15)

This page summarizes Q2 FY2026 review outcomes for customer-facing roles and entitlements. Metrics are sourced from the Identity Governance platform snapshots dated 2026-06-30 and cross-checked by control owners. The intent is to show volume, attestation completeness, and any segregation-of-duties observations without describing implementation specifics. All counts reflect production customer tenants. Where reviewers have submitted revocations, the underlying requests are tracked to completion through standard channels, and no policy exceptions are recorded. External audit viewers are time-bound and logged. No privileged operational details or authentication mechanisms are included here.

Summary:

- Attestation completion across customer-facing roles met or exceeded 99.7%, with no segregation-of-duties conflicts identified.
- All catalog changes this quarter were documentation and metadata clarifications; no functional expansion of customer capabilities occurred.
- Next scheduled enterprise-wide review cycle: 2026-09-30 (UAR-2026-Q3-ALL), owned by the Identity Governance Office.

Customer Entitlement and Authorization Matrix -- Page 3

The following catalog segment enumerates active customer-facing entitlements used by Trading, Post-Trade Operations, and Client Reporting domains at Meridian Capital. Entries reflect the master catalog snapshot extracted from the Identity Warehouse on 2026-07-15T04:30Z. Counts are inclusive of production users only and exclude service principals. Approval workflows are validated with Application Owners and Compliance Operations per current catalog configuration. Review cadences align to the published access certification calendar and are tracked in Governance Center.

Customer Entitlement and Authorization Matrix -- Meridian Capital

Page 5 of 15

The following inventory enumerates approved application entitlements and associated governance attributes across Meridian Capital's core customer-facing and operational systems. Each entitlement is tied to a business role, mapped to a provisioning group, and governed through standardized approval workflows. Segregation-of-duties (SoD) flags indicate combinations that require additional review before certification. Change history is tracked via ServiceNow references, with timestamps recorded in UTC. This view is maintained by Identity Governance in coordination with application owners and line-of-business role stewards. All statuses reflect the latest quarterly access certification cycle and in-flight maintenance tickets where applicable.

Customer Entitlement and Authorization Matrix -- Meridian Capital

Page 6 of 15

This section consolidates access review observations and remediation tracking for Q2 FY26. Findings include out-of-cycle transfers, stale entitlements, and mapping variances identified during the certification campaign. Each record is associated to a control reference, business owner, and a target resolution window. Evidence references indicate where attestations or deprovisioning confirmations are stored. Status and timestamps reflect live updates from the Identity Governance workstream in coordination with Application Owner teams.

Summary Commentary:

- The access certification cadence is on track; no overdue items as of the latest run.
- SoD candidates are being addressed with removal or independent approver designation.

- Ownership variances primarily stem from organizational realignment; remediation is procedural and low risk.
- Evidence tickets include attestations, role mapping updates, and deprovisioning confirmations, aligned to control references.

Customer Entitlement and Authorization Matrix -- Page 7 of 15

The following entries catalog customer-facing and advisor-support entitlements for Retail and Advisory channels. Each record aligns to the Meridian Capital role taxonomy and shows the most recent certification activity. Status reflects the Q2 FY2026 scheduled review window; all items listed as Compliant have completed attestation and QA sampling. Notes capture operational context only (no policy exceptions recorded). Data owners and approvers are recorded per the enterprise RACI standards maintained by Identity Governance.

Customer Entitlement and Authorization Matrix -- Page 8 of 15

This section enumerates Institutional and Treasury entitlements used by corporate, endowment, and high-volume clients as well as internal operations supporting those relationships. Cross-system dependencies are cataloged for visibility; reviewers verified Segregation of Duties (SoD) checkpoints and attestation windows during the Q2 FY2026 cycle. All controls operated within target service levels. No exceptions to standard approval flows were recorded. Metrics at the end of this page summarize operational performance and catalog hygiene.

Page 9 -- Q2 FY2026 Access Recertification Outcomes by Application

The following table summarizes attestation outcomes for the Meridian Capital Q2 FY2026 access recertification campaign across priority customer-facing and operational platforms. Results are grouped by application/service, with each entitlement reviewed by the designated business owner and control owner. Counts reflect user populations as loaded from authoritative sources at campaign open. Status values and ticket references align with Governance Center tracking and are audit-anchored to UTC timestamps.

Attestation control performance remains consistent with prior quarters. Items marked Under Review or On Track have open attestations within the window and no escalation thresholds breached. No policy exceptions were recorded or requested in this campaign cycle. Revocations were initiated via standard IAM workflow and tracked against referenced tickets; all revokes completed within the defined operations SLA.

Page 10 -- Entitlement Change Request Log (Q2 FY2026)

This log captures entitlement modifications processed during Q2 FY2026 for customer-impacting platforms. Each request is referenced to its control-validated approval and includes requestor details, timestamps, and implementation outcomes. All items observed here follow standard governance routing; no deviations from approved pathways were identified, and closure status is reflected as of the listed completion timestamps.

Operational summary: 30/30 requests closed within SLA; 0 withdrawals; 0 escalations. Justifications mapped cleanly to HR and attestation triggers where applicable. All approvals recorded by named business owners with timestamps; no re-approvals or rework cycles were required in the period under review.

Page 11 -- Customer Entitlement and Authorization Matrix (Meridian Capital)

Quarterly entitlement recertification activities for Q2 FY2026 were completed on schedule across all in-scope customer-facing platforms. The Identity Governance Team coordinated cross-functional reviewers to affirm least-privilege access, reduce dormant assignments, and align entitlements to current job functions. The table below represents the consolidated review ledger for high-use customer entitlements. Decisions reflect manager attestations supported by usage telemetry and access request history. All revocations and modifications have associated change tickets for traceability, and no critical customer access dependencies were disrupted. Completion was certified by IAM Governance on 2026-07-02 16:45:12 UTC following reconciliation of pending evidence attachments.

All remediation items initiated by Modify/Revoke decisions are tracked to closure with change control references and are scheduled to complete within the Q3 FY2026 window. No additional access expansion requests were bundled into this cycle.

Page 12 -- Customer Entitlement and Authorization Matrix (Meridian Capital)

The Segregation of Duties (SoD) analysis for customer-facing entitlements was refreshed at quarter-end using established conflict rules. The objective was to confirm that no single user holds conflicting authorities that could bypass standard oversight. Control references denote cataloged detective and governance controls that operate continuously and were evidenced during the review. The SoD conflict register below summarizes rules, scope, population impact, ownership, and current disposition. All identified combinations remain within risk tolerance following mitigations, and no break-glass or exception pathways were observed during the period.

Customer Entitlement and Authorization Matrix -- Meridian Capital

Page 14 of 15

This page provides operational metrics for entitlement activity and governance performance in Q2 FY2026. KPIs reflect throughput, timeliness, and control checks across customer-facing platforms. SLA adherence remained strong; no material audit findings were recorded.

Summary Commentary

- SLA attainment: 98.9% across all BUs, consistent with enterprise target (>=98.5%).
- SoD conflicts: Low incidence; all cases resolved within two business days via reassignment or scope refinement.
- Audit coverage: 212 samples tested, 0 reportable findings; evidence archived under IG-Archive-Q2-2026.
- Next steps: Wave 3 certifications scheduled for 2026-07-08; scope includes non-production entitlements for parity review.

Customer Entitlement and Authorization Matrix -- Meridian Capital

Page 15 of 15

This final page consolidates quarter-end attestation outcomes, operational closeout metrics, and evidence references related to the Customer Entitlement and Authorization Matrix. The data below reflects reviews completed by Identity Governance & Administration (IGA), Risk & Controls (R&C), and Access Operations (AO) through 2026-07-22 18:00:00Z. All identifiers are internal; no customer PII is included.

Closing Statement

The above artifacts and disposition records complete the Q3-cycle coverage for customer-facing entitlements. Ownership, approval lineage, and role-catalog alignment have been validated across Retail, Small Business, Corporate, Wealth, Treasury, and Enterprise functions. Any subsequent updates will be recorded under the next quarterly cycle and linked via standard change and evidence references.
